

**IN THE CLAIMS:**

*Please amend the claims as follows:*

1. *(currently amended)* ~~Method~~ A method for automatically adapting the contents of a mobile homepage of a mobile telephone device in accordance with context related information of said device, comprising
  - automatically determining context related information of said mobile telephone device, and
  - automatically adapting said mobile homepage in accordance with said determined context related information.
2. *(currently amended)* ~~Method~~ The method according to claim 1, further comprising evaluating said determined context related information and adapting said homepage in accordance with a result of said evaluation operation.
3. *(currently amended)* ~~Method~~ The method according to claim 1 ~~[[or 2]]~~, further comprising dispatching a communication request.
4. *(currently amended)* ~~Method~~ The method according to claim 1, ~~[[2 or 3,]]~~ further comprising receiving a communication request.
5. *(currently amended)* ~~Method~~ The method according to claim 3 ~~[[or 4]]~~, wherein said communication request is a multimedia call.
6. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, wherein said context related information comprises communication properties.
7. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, further comprising transmitting of said generated mobile homepage.
8. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, further comprising receiving an identification of the originator of a communication attempt.

9. *(currently amended)* ~~Method~~ The method according to claim 6, wherein said communication properties comprise information about a communication connection of said mobile telephone device such as signal strength, location bandwidth or data rate.
10. *(currently amended)* ~~Method~~ The method according to claim 6, wherein said communication properties comprise information according to a communicative state of said mobile telephone device.
11. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, comprising
- downloading the contents of a mobile homepage of said mobile telephone device,
  - storing said downloaded mobile homepage on a server, said server containing a homepage, thereby automatically updating said homepage on said server according to said mobile homepage of said mobile telephone device.
12. *(currently amended)* ~~Method~~ The method according to claim ~~[[13]]~~ 11, wherein said downloading is initiated when it is detected that the attainability of the mobile telephone is expected to be reduced.
13. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, comprising
- receiving a communication request for a connection to said mobile device,
  - detecting if said mobile device is connectable, and
  - in case said mobile device is not connectable, rerouting said communication request to a homepage downloaded from said mobile telephone device said communication request has been directed to.
14. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, wherein said homepage is an HTML or XHTML homepage.
15. *(currently amended)* ~~Method~~ The method according to ~~anyone of the preceding claims~~ claim 1, wherein said homepage is a WML homepage.

16. *(currently amended)* ~~Software~~ A software tool comprising program code means for carrying out the steps of ~~anyone of claims 1 to 15~~ claim 1 when said program is run on a network device or a mobile telephone device.
17. *(currently amended)* ~~Computer~~ A computer program comprising program code means for carrying out the method of ~~anyone of claims 1 to 15~~ claim 1 when said program is run on a computer or network device.
18. *(currently amended)* ~~Computer~~ A computer program product comprising program code means stored on a computer readable medium for carrying out the method of ~~anyone of claims 1 to 15~~ claim 1 when said program is run on a network device or a mobile telephone device.
19. *(currently amended)* ~~Mobile~~ A mobile telephone device, comprising :  
a server that provides a server functionality to said mobile telephone device,  
a storage for storing at least one homepage on said mobile telephone device,  
characterized by  
a processor configured to determine context related information of said mobile telephone device and to adapt said homepage according to said determined context related information.
20. *(currently amended)* ~~Mobile~~ The mobile telephone device according to claim 19, further comprising at least one component for evaluating said context related information.
21. *(currently amended)* ~~Mobile~~ The mobile telephone device according to claim 19 [[or 20]], further comprising
- a processor configured to connect said mobile telephone to a server, and configured to transfer the contents of a mobile homepage of said mobile telephone device to said server.
22. *(currently amended)* ~~Mobile~~ The mobile telephone device according to claim 21, further comprising a processor configured to detect an attainability status of said mobile telephone device and to initiate said transfer of the mobile homepage contents, in case a decreased attainability status is detected.

23. *(currently amended)* ~~Network~~ A network server connectable to a mobile telephone device, comprising:  
a storage for storing at least one homepage,  
characterized by  
a processor configured for downloading a mobile homepage from said mobile telephone device, and  
a storage being connected to said processor for storing said downloaded homepage.
24. *(currently amended)* ~~Network~~ The network server according to claim 23, further comprising a processor configured to detect an attainability status of said mobile telephone device, and being configured to initiate said download of the mobile homepage, in case a decreased attainability status of said mobile telephone is detected.
